

Project Proposal

For the Degree Program in Sustainability Studies

Project outline: Inclusive packaging concepts for people with disabilities

Duration: 5-6 Months (27,5 ECTS = 825 h)

Location: Home Office

Possibilities for a follow-up Master's Thesis: Yes, e. g. full application for the research project or Master's Thesis on the content of the granted project

Potential Cooperation Partners (if applicable): None

Supervisor / Contact: Alina Kleiner, M.Sc.

Aim of the project: The aim is to provide a project outline for a research project on the topic of "inclusive packaging for people with disabilities"

Project description: As part of the research project for which the project outline is to be written, the requirements of people with disabilities for packaging are to be determined. Furthermore, the project to be applied for should develop more sustainable packaging concepts that are customised to the requirements of people with disabilities. The project outline should be drawn up in accordance with the specifications of a potential funding programme.

Suitable for / Requirements for the student: Can be carried out in German or English. The student should be interested in the topic, have an independent way of working and be willing to familiarize themselves with the process of writing a research proposal.
